About This Game

Into Oblivion is a drinking contest of ridiculous proportion. Each player is dealt five item cards each round and attempts to make one of many mixed drinks for themselves or their opponents. Some drinks have additional status effects, some will make you puke instantly, while others just leave a funny taste in your mouth.

Legend has it that this mysterious marvel of engineering known as the Pocket Brewer was invented by Dr. Cyrus Stansfield as a means of keeping the homeless away from his dental office's parking lot. Some say it was crafted by the government to subdue the masses of Starkham. Others say some highly motivated drunks cobbled it together when the Noose & Rafter briefly shut down for the summer. Regardless of how it happened, it has allowed the denizens of the town to easily make dangerous alcoholic drinks and hold all-too frequently drinking contests.

The game takes place in various seedy locations through the city of Starkham (prominently featured in our previous games) and against some of its better known inhabitants. Players can customize their character as well as challenge friends online or via LAN. Bet on your matches to gain money to buy upgrade, cosmetic skins, and items from the local Shady Merchant.

Now with Easter Event mode! Only active during the Easter holiday season, the game unlocks a new drinking opponent, two extra achievements, and arena. If you beat H.H. Bunny you keep the unlocks all year round!

THIRSTY FOR FEATURES

The game has the following features best laid out in list format with snappy phrases like:

- Personal and global statistics on debauchery
- Our favorite half-time mini-game Midnight
- Online or LAN multiplayer

DRINKING BUDDIES

The game features online and LAN cross-platform multiplayer for Linux and Windows so you can drink your buddies under the table no matter what operating system they use... as long as it's not a Mac.

HAVEN'T HIT BOTTOM

Similar to the "Street Loyalty" features of our last game, The Dope Game, there are some small bonuses for players of our other games. Mostly of the cosmetic variety. Each game played unlocks a different skin set to mix and match with the ones you have already. If you haven't played any of our previous games, fear not, you'll only have to spend a little coin to get them as well.

i love this game it is awsome. Interesting game.. Good stuff. Highly replayable in NG+. Gogogo buy this game !. This is a game that i am going to rate a 6/10 as this is going to be something that i can go on now and then and play the game but it's something that if you have to go out soon or something, you are able to play a couple of level great game and amazing for the achievements.

Overall decent game. Hope they improve the user interface when searching for songs, and I hope they can allow us to choose our own visuals for each song.. DO. NOT. BUY.. love the game

i can only play with keyboard which i don't like to much, please add joypad also,

thanks. I love this game. For a fact, this is historically accurate and I recommend it to people who pass by the world war 1 section in steam. I would rate it 10/10.. This is a small tileset pack that will add some Sci-Fi interiors to your world, not enough to make a whole game. It would require some modification to add the exteriors of ships and buildings, but works well as a base for those modifications. Having a similar artstyle as the Halloween, Evil Castle, Dungeons & Volcanoes and Royal packs, it works with them for some world-building. Thus, it's not advised as a stand-alone.. '- A life ruining gaming experience.' Ok.. Absolutely do not buy and do not support. This is a repackaging of the absolute failure of Welcome to Hanwell...and NOT EVEN A GOOD ONE! Nathan, instead of focusing on all this piddly crap like extra game modes, focus on making the actual MAIN game better. Improve the combat (which is trrrrashhhhhh) and fix some of the game breaking glitches. I'm pretty sure as an owner of WTH I got this for free but it was such a turn off after playing the original that I refuse to even acknowledge it. Disgusting. A bastardization of WHAT SHOULD HAVE BEEN horror game of 2017.
