Take control of the unique UNESCO Branded Ge 4/4 III in this enhancement pack add-on for Train Simulator.

The opening of the Vereina Tunnel, what would become the 5d3b920ae0

Title: Train Simulator: RhB Enhancement Pack 01

Genre: Simulation

Developer:

Thomson Interactive

Publisher:

Dovetail Games - Trains

Franchise:

Train Simulator

Release Date:

English

train simulator rhb enhancement pack 01

It's da best train in train simulator.. After the release of Albula Line, it was a little boring with almost no rollingstocks etc. But with this Add-on, for the Add-on, you get some more rollingstock, scenery files etc.. A must have, once you got the Albula line. You get some additional freight wagons, regio train coaches and some more goodies like an additional livery for the loco. Unfortunately not an additional loco.. This is exactly the same train you get with the basic route. It doesn't even have any new additional functionality, wow the windows open automatically, wow a new livery. This should be a free update.
