About This Game

WHAT IS WITHOUT ESCAPE?

Without Escape harkens back to first-person graphic adventures of the early '90s, which relied on pre-rendered backgrounds and full-motion video to tell interactive stories. Explore the confines of your own home as you flip between a mundane existence and a horrifying otherworld. Can you escape the nightmare and find the answers you're looking for?

STORY

One chilly winter night, you go home and notice that nobody's there. Your parents had told you that they would be visiting your grandparents for the weekend, so you give their absence no mind and go to bed.

At 2:45 a.m., your sleep is suddenly interrupted by strange noises. A burglar, perhaps? You decide to investigate – only to plunge into a nightmarish web of stone, flesh, and flame.

With no way to return to what you thought was reality, you must unravel the secret of your home's transformation. Are you

prepared to endure the horrors that await you?

FEATURES

- Reconnect with the past through classic point-and-click exploration.
- Overcome enigmatic puzzles that will test your wits.
- Play your way with gamepad, keyboard and mouse support.
- Immerse yourself in your home's oppressive atmosphere with an atmospheric soundtrack.
- Gaze upon 1080p pre-rendered backgrounds – in your old home, which has become a hellish nightmare.
- Discover multiple endings, secrets, and Easter eggs.
- Race against your friends and others with online leaderboards.
- Unlock several achievements.

Title: Without Escape

More like Regular Poopie Island MEH.. I wish i could see my curser so i knew where i was on the screen. Damn, this game was powerful. I rate the game Inside Me 2.5/5. It's almost OK. Actually, if it wasn't so amazingly frustrating, it actually would've been good.

This game gets a lot right. It has good graphics (for a game of its genre), interesting gameplay mechanics, good controls, great music (I really wish there was a soundtrack for this game but there isn't), good sound and an interesting setting. But for all this it gets one important thing very, very wrong; This game is too hard.

This game too hard for commentators who try to play it on youtube. It is freaking hard and as a direct result it is extremely frustrating. To make matters worse, the fact that this game gets so much right makes the act of trying to play it (and repetitively failing) that much more frustrating. And then, to top it all off, if you really love this game's music like I do, **THERE IS NO SOUNDTRACK WHICH YOU CAN BUY** and the music isn't even on youtube.

My recommendation? Avoid even getting involved with this game. I was able to get to the second boss (the one right after the travel, cell-dodging section) but that was it. I was unable to finish this game. Argh! And as hard as the normal game levels are, the bosses are 2-3 times worse if you can believe it. So frustrating!. A single-player game requiring full online connection all the time?

Pffff...

Stable connection is not always guaranteed since I do travel.

I'd support and play this and see it all the way through if it weren't for the atrocious online requirement.

Oh, and the invert y-axis option (mouse) is either broken or non-existent.

Sorry. I'm old school.. A casual point-and-click adventure with some devilishly hard hidden-object scenes. There aren't many locations in the town of Silentville, but they're all beautifully rendered, and there's decent voice acting.

There's a lot of challenging point-and-click adventuring to be had. Playing it on "expert" mode really requires some expertise in the genre. Unfortunately, the difficulty is not always fair. There are items in the hidden-object scenes that are very visible, often at the very edge of the visible space. Some of the point-and-click puzzles make no sense.

The game engine is also a bit rough around the edges, with weird UI quirks and a few bugs. But nothing that stopped me from playing and enjoying.

Despite the problems, I'm sure fans of hidden-object games would like this.. Seems too short,only about a hour and a half long for the 3 main paths. I love it and I wish it was longer.. This is advertised as a roguelike but this advertising is misleading.

This is more of a bullet-hell style game where you sit in a room and dodge obstacles while shooting the enemies that slowly move towards you. You can pick up some gold from some barrels, then you press "E" to get another "procedurally generated" room.

The term "procedural generation" is very loosely used here. The map generator just changes the positions of things in the same room every time.

This game has a huge amount of negative reviews and it's completely understandable. There's probably about 30-60 seconds worth of gameplay all up.

The gameplay is so limited I can't even think of any better substitutes, as there just isn't enough gameplay to start to build a comparison. Every other game ever made has more depth!. <https://forum.paradoxplaza.com/forum/index.php?threads/vis-ther-any-plan-to-add-chinese-support-in-ck2%E3%80%81eu4%E3%80%81hoi4-and-stellaris%EF%BC%9F.1077611/>

[Just don't like what AndrewT response in the thread. It looks like it could be a fun game and the theme music is really good, but considering it's been out for just over two months now, there are no other online players than me, and it peaked at 7 players online at the same time \(according to Steamcharts\), I'd say it's dead and won't come back.](#)

I love this developer. He was kind enough to give me a beta key for the original game upon asking so it's nice to see him create additional content in order to fix the issue of not being able to keep the game in my library.

I really enjoyed the original game so any additional content is great for me and a nice way to put some cash in the pocket of a generous, friendly and not to mention talented developer. Well worth the purchase.. its fine. same as every RPG games i played. The game is pretty nice, especially the story. It's a horror-HOG, which is a nice mix. I would rather like when the characters would talk and the speech wouldn't be written but in this game it doesn't really matter. There is not that much talking.. I have loved this game for years! Still playing it to this day. I even have my original receipt for the original.. This is the single worst game masquerading as a flight simulator I've ever played. Broken english fresh out of google translate, impossibly overcomplex and labyrinthine menus on top of godawful graphics straight out of a mobile game and dull, uninspired gameplay with a pay-to-win game structure... the only thing I unenjoyed was hitting the 'uninstall' button, which fortunately, worked just find.. This game is ♥♥♥♥ing awesome !!!
